

# GET A RIGMASTER APU TURN OFF YOUR ENGINE TURN ON THE SAVINGS TURN UP THE COMFORT

## Stop Idling and Save on Fuel and Service Costs

RigMaster is an industry pioneer and supplier of Auxiliary Power Units (APUs). Shutting down your truck's engine and turning on a RigMaster unit not only gives you the comfort you need, but could save you thousands of dollars a year in fuel and service costs. Plus, RigMaster power extends your truck's service intervals, increases resale value and reduces engine wear and tear. Visit [rigmasterpower.com](http://rigmasterpower.com) to calculate your fuel savings now.

## Why use an APU?

- Reduce idle time
- Decrease operating costs
- Increase driver comfort and satisfaction

## Features:

- Warms truck engine
- Charges truck battery
- Exceeds many EPA requirements
- Powers sleeper air conditioning and heating
- Extremely quiet
- Compact size

## Why RigMaster?

- Quality components and flexible mounting options, no frame drilling required
- Fastest installation time in the industry
- A leading producer of anti-idling solutions for the transportation industry
- Choose between a 1-year/2,000-hour or 2-year/4,000-hour warranty
- Technology that's right for fleets and owner-operators everywhere
- A leader in performance, value and dependability
